

## HAWAAN FOREST WALK 24. Nov 2019

In the Invitation I mentioned the length of the walk would be 1 ½ - 2 hours long. This put quite a few people off. Too strenuous they said. At least half of the participants completed the walk, the

rest were airlifted by helicopter to the nearest hospital. As you can see, it was not too bad at all.

Leaving Hillcrest, it was cold and there was light rain. I was glad I packed my rain jacket in my back bag. Of course St Peter never lets the Swiss Club down, there was no rain during that day. It was hot and humid and I was sweating like a race horse.

The walk was very interesting and educational, all 11 participants enjoyed it. I admired many trees, which I have never seen before in my life. From time to time we stopped and it was explained by the guide what was before us. I confirmed with him, that the spaghetti like strings hanging from a tree were not for ringing a bell.

After the walk, there was the lunch in the Miami Spur Steak Ranch. Due to my heavy sweating during the walk, I arrived at the restaurant smelling like a herd of water buffalos in the midday sun. Despite

that we all enjoyed our lunch.
